

Conducting On-campus Examinations

- Online examinations were originally proposed due to the Covid pandemic situation and that was practised by many universities and institutes both locally and internationally. Accordingly, SLIIT obtained the approval of the Ministry of Education (MOE) to hold the examinations online explaining the circumstances. While giving approval MOE advised us to revert back to on-campus examinations whenever it becomes possible. Considering that the covid situation has significantly improved and the GCE OL examinations are conducted island-wise, it will not be possible to obtain approval for online examinations. As such we have decided to hold the final examinations on-campus as per our usual practice. Presently, the same approach is adopted by other universities and institutes as well.
- We are very much aware of the difficulties that are encountered by our students due to the prevailing situation in the country as all of us are in this together. However, we need to understand that the solutions to the current challenges are long-term. Therefore, we will have to deal with these challenges and move forward. SLIIT is committed to delivering high-quality education despite the current challenges to ensure the success of our graduates.
- As per the request made by SIS on behalf of the students the faculties/schools have decided to make adjustments to the examination timetables. Please refer to the relevant timetables and notices published on faculty pages of Courseweb.
