

How to ease your next semesters...

Semester Structure (Regular batch)

Semester 01

SE3040 - Application Frameworks

SE3020 - Distributed Systems

SE3030 - Software Architecture

SE3010 - Software Engineering Process
and Quality Management

Semester 02

SE3050 - User Experience Engineering

SE 3060 - Database Systems

SE3070 - Case Studies in Software
Engineering

SE3080 - Software Project Management

Semester Structure (June batch)

Semester 01

SE3050 - User Experience Engineering

SE 3060 - Database Systems

SE3070 - Case Studies in Software Engineering

SE3080 - Software Project Management

Semester 02

SE3040 - Application Frameworks

SE3020 - Distributed Systems

SE3030 - Software Architecture

SE3010 - Software Engineering Process and Quality Management

SE3040 - Application Frameworks

- Learn about some JavaScript technologies.
- Technical Blog (6 articles - one per bi-weekly)
- Mid-Term examination
- 1 React project

Conference Management System.

- Final Examination (4hrs)

POSTMAN

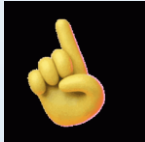

docker

How to get ready?

- Start grabbing basics of course content. (mainly on **JavaScript**, **React** and **NodeJS**)
- After learning some basics, watch crash-courses on YouTube.
- Take a look at some past-papers as early as possible.
- **DON'T** wait until lectures start. 
 - For React, try to learn,
 - **How React works?**
 - **Class components** vs **Functional Components**
 - **React Hooks** (useState, useEffect, etc...)
 - **Context API** and **Redux**

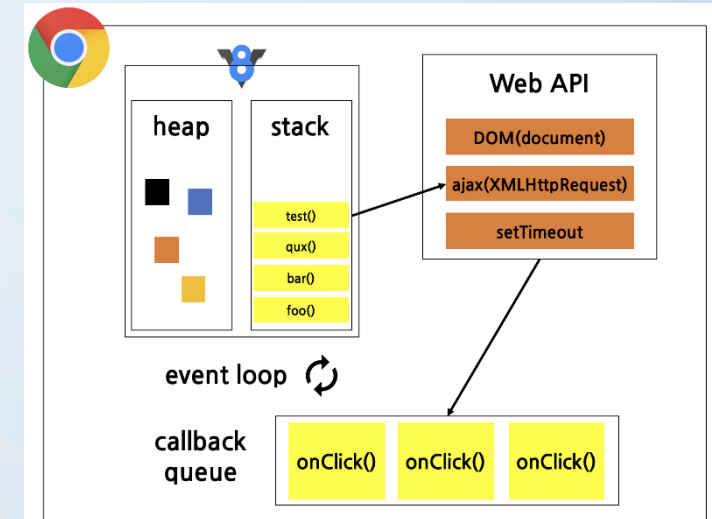

Most importantly....learn JavaScript **JS**

- Without JavaScript knowledge, no point of learning React, NodeJS, etc...
- Try to learn,
 - JavaScript syntaxes (**var**, **let** and **const**)
 - **_proto_** of an object
 - **Map**, **filter**, **reduce** methods
 - **Higher Order Functions**
 - **Callbacks**, **Promises** and **Async-Await**

- For NodeJS, try to learn,
 - **How NodeJS event-loop works?**
 - **Writing REST APIs**
 - **Configuring NodeJS for MongoDB CRUD operations.**
- For MongoDB, try to learn,
 - **What are NoSQL databases?**
 - **How to perform CRUD operations. (learn about “Mongoose”)**

How NodeJS event-loop works?

YEAH, THAT ONE!

Some Resources

- For React Basics,
 - ❖ ([React 16: The Complete Course \(incl. React Router 4 & Redux\) | Udemy](#))
 - ❖ YouTube channels that I referred,
 - [Academind – YouTube](#)
(<https://www.youtube.com/watch?v=Dorf8i6lCuk>) – 3hrs
 - [traversy media – YouTube](#)
(<https://www.youtube.com/watch?v=w7ejDZ8SWv8>) – 2hrs
 - ❖ React Documentation ([Getting Started – React \(reactjs.org\)](#))

- For NodeJS Basics,
 - ❖ ([NodeJS - The Complete Guide \(MVC, REST APIs, GraphQL, Deno\) | Udemy](#))
 - ❖ YouTube channels that I referred,
 - **How Event-loop works?**
(<https://www.youtube.com/watch?v=8aGhZQkoFbQ>) – 30mins
 - **traversy media – YouTube**
(<https://www.youtube.com/watch?v=fBNz5xF-Kx4>) – 2hrs
 - ❖ NodeJS Documentation ([Documentation | Node.js \(nodejs.org\)](#))
- For JavaScript Basics,
 - ❖ <https://www.youtube.com/watch?v=PoRJizFvM7s> – JS Async Await
 - ❖ <https://www.youtube.com/watch?v=W6NZfCO5SIk> – JS Crash course
 - ❖ [Clever Programmer - YouTube](#)

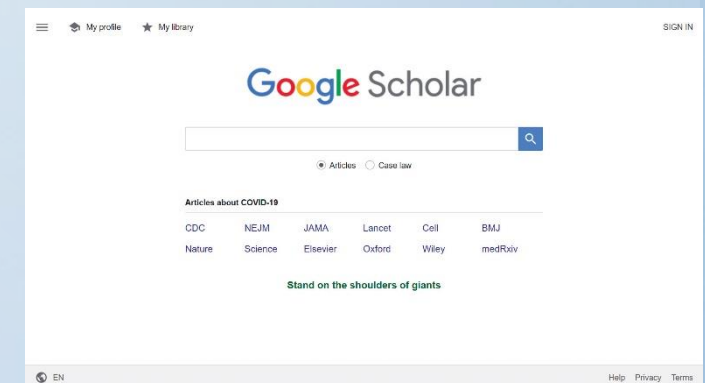

SE3020 - Distributed Systems

- Concepts and applications of Distributed Computing.
- Two assignments
 - Assignment 01 – **Writing a review paper (like a research paper)**
 - Assignment 02 – **Developing a shopping platform using any *JavaScript framework* and *WSO2 Enterprise Integrator***
- Lab Exercises
- Final Examination

How to get ready?

- For Assignment 01,
 - ❖ Be familiar with **MS Word features** (Adding References, etc...)
 - ❖ Use **Google Scholar** for gathering more information.
 - ❖ See some sample review papers (in IEEE format) on the internet.
 - ❖ Should write a 6–8-page review paper. You have **a lot** to write.
 - ❖ **NO** Coding stuff.

- For Assignment 02,
 - ❖ Be familiar with **any JavaScript framework**(React or Angular or Vue or etc.....)
 - ❖ Be familiar with **how WSO2 EI (Enterprise Integrator) works.**
 - ❖ Try to be familiar with the **documentation** provided by WSO2 because it is hard to find video tutorials. (almost no..☹)
 - ❖ Spring-boot is relatively **easier** than NodeJS so if you like, try that out as your Backend.
 - ❖ **100%** Coding.

Some Resources

- For Writing the review paper (assignment 01),
 - ❖ [How to write a review paper? Learn from the Scratch. Know about benefits of a review. - Bing video](#)
 - ❖ [IEEE Reference in MS Word - Bing video](#)
- For Developing shopping platform (assignment 02),
 - ❖ [ReactJS + Spring Boot CRUD Full Stack Application - YouTube](#)
 - ❖ [Overview - WSO2 Enterprise Integrator Documentation](#)

SE3030 - Software Architecture

- Learn about different types of Software Architectural Patterns.
- Two assignments
 - Assignment 01 – **Implementing a scenario using OSGi framework.**
 - Assignment 02 – ***Presentation based on a case study about a Software system with its Architecture style and Key Quality Attributes.***
- Final Examination

How to get ready?

- For Assignment 01,
 - ❖ Recap the knowledge on **Java with Eclipse IDE.**
 - ❖ Give fullest attention to the **lab sessions.** (mainly on the **OSGi lab session**).
 - ❖ Recruit group members with **active collaboration.**
 - ❖ **100%** Coding.

- For Assignment 02,
 - ❖ Give fullest attention to the **lectures**. (because all the information can be gained only from lectures)
 - ❖ Do a small research on **Architectural styles used by other tech companies** (like Facebook, Google, etc...).
 - ❖ You may have a **VIVA**, so get ready to it.
 - ❖ **NO** coding.

Some Resources

- For Assignment 01 (OSGi assignment),
 - ❖ **lab sessions** are the only resource I used. So, give your fullest attention to those.
 - ❖ If you aren't familiar with Java,
 - ❖ [Java OOPs Concepts | Object Oriented Programming | Java Tutorial For Beginners | Edureka - YouTube](#)
 - ❖ [Object-oriented Programming in 7 minutes | Mosh - YouTube](#)

- For Assignment 02 (Presentation),
 - ❖ What is Software Architecture? (Monolithic vs. Layered vs. Microservice) - YouTube
 - ❖ Concentrate to the **lectures until the end**. (because **last few lectures** will contribute to more than 50% for your entire assignment).

- (PDF DOWNLOAD) Head First Design Patterns (d-pdf.com)
- Design Patterns in Object Oriented Programming – YouTube – playlist explains every pattern in above book **with examples**

SE3010 - Software Engineering Process and Quality Management

- Learn about Software Testing, Software Metrics and Software Quality & Testing Tools.
- Two assignments
 - Assignment 01 – **Presentation on Test management tool or Bug tracking tool.**
 - Assignment 02 – ***Introduce a new complexity metric.***
- Lab Test
- Final Examination

How to get ready?

- For Assignment 01,
 - ❖ Research on some existing **Test management Tools and Bug Tracking tools.**
 - ❖ Know how they work and how to work.
 - ❖ Recruit group members with **active collaboration.**
 - ❖ **NO** coding.

- For Assignment 02,
 - ❖ Research on some complexity metrics
 - ❖ Concentrate on the **lectures and lab sessions until the end.**
 - ❖ Try out examples of calculating complexity metrics.

Yep...there are Maths to do....

Semester 02

SE3050 – User Experience Engineering

- Learn about User Interface designing and User Experience.
- One mini project – **Redesigning an existing UI of an app**
- Technologies and Tools that we will learn,
 - **Flutter**
 - **React Native**
- Some resources I found,
 - [Flutter Crash Course for Beginners 2021 - Build a Flutter App with Google's Flutter & Dart – YouTube – 5hrs](#)
 - [React Native Tutorial for Beginners - Crash Course 2020 - YouTube– 5hrs](#)

SE 3060 - Database Systems

- Learn about some deep concepts in Database systems.

- **NO** projects and assignments.

- But this might be the **hardest** module in the semester.

SE3070 - Case Studies in Software Engineering

- Learn about case studies in Software Engineering.
- Get ready to draw some **diagrams** again.
(like in 2nd Year)
- Final Examination.

SE3080 - Software Project Management

- Learn about concepts in software project management.
- **BIG** project to be done. (Developing an application) – Web/Desktop Application
- Can use **Java or any technology**.
- **100% coding**

BONUS Tips

- If you are a **VS Code** fan, try these extensions to make your work easier.

Simple React Snippets

burkeholland.simple-react-snippets

Burke Holland | 1,003,094 | ★★★★★ | Repository | v1.2.3

Dead simple React snippets you will actually use

[Disable](#) [Uninstall](#) [⚙️](#) This extension is enabled globally.

Prettier - Code formatter

esbenp.prettier-vscode

Prettier | 13,354,919 | ★★★★★☆ | Repository | License | v8.0.1

Code formatter using prettier

[Disable](#) [Uninstall](#) [⚙️](#) This extension is enabled globally.

Material Icon Theme

pkief.material-icon-theme

Philipp Kief | 8,032,589 | ★★★★★ | Repository | License | v4.7.0

Material Design Icons for Visual Studio Code

[Set File Icon Theme](#) [Disable](#) [Uninstall](#) [⚙️](#) This extension is enabled globally.

Thunder Client

rangav.vscode-thunder-client

Ranga Vadhineni | 161,003 | ★★★★★ | Repository | License

Rest API Client for VS Code, GUI based Http Client

[Disable](#) [Uninstall](#) [⚙️](#) This extension is enabled globally.

Better Comments

aaron-bond.better-comments

Aaron Bond | 1,848,867 | ★★★★★ | Repository | License | v2.1.0

Improve your code commenting by annotating with alert, informational, TODOs, and more!

[Disable](#) [Uninstall](#) [⚙️](#) This extension is enabled globally.

Draw.io Integration

hediet.vscode-drawio

Henning Dieterichs | 350,843 | ★★★★★ | Repository | v1.5.0

This unofficial extension integrates Draw.io into VS Code.

[Disable](#) [Uninstall](#) [⚙️](#) This extension is enabled globally.

Auto Rename Tag

formulahendry.auto-rename-tag

Jun Han | 5,771,824 | ★★★★★☆ | Repository | v0.1.6

Auto rename paired HTML/XML tag

[Disable](#) [Uninstall](#) [⚙️](#) This extension is enabled globally.

Flutter

dart-code.flutter

Dart Code | 2,916,884 | ★★★★★ | Repository | License | v3.23.0

Flutter support and debugger for Visual Studio Code.

[Disable](#) [Uninstall](#) [⚙️](#) This extension is enabled globally.

Dart

dart-code.dart-code

Dart Code | 3,097,501 | ★★★★★ | Repository | License | v3.23.1

Dart language support and debugger for Visual Studio Code.

[Disable](#) [Uninstall](#) [⚙️](#) This extension is enabled globally.

Error Help

gihansiriwardhana.error-help

Gihan Siriwardhana | 108 | ★★★★★☆ | Repository | v0.0.5

Search help for your errors and warnings

[Disable](#) [Uninstall](#) [⚙️](#) This extension is enabled globally.

PROGRAMMING IS ALL ABOUT THESE
